

ABOUT US

'Suvrat Industrial Products India Private Limited' has been established with a vision to provide best solutions in the field of flexible packaging in central India. We have developed our manufacturing unit at Mandideep Industrial Area in state capital of Madhya Pradesh, Bhopal. We are keenly focused to work with various food, healthcare, textile and consumer goods industries under flexible packaging segment.

PRODUCTS

Films:

- Poly film rolls with thickness from 20 to 200 microns with maximum width upto 1750 mm
- Surface printed Poly film rolls
- Rotogravure printed BOPP rolls with 8 colours
- Shrink wrap film
- Mulch film
- Stretch film
- General purpose, lamination, food grade films etc.
- Blister Film

Bags and Pouches:

- Wicketed Bottom Gusset Bags
- Bottom Gusset Bags
- Handle Gusseted Bags
- Three side seal
- Center fin seal / Lap seal pouches
- Gusseted pouches
- Slider zipper Pouches
- Dotted seal bags
- Strip inserted bags
- Pouch with other generic attachments like Euro (hanger) punch, round hole punch, V-notch punch, tear slit punch, perforation, customer specific requirement/s.

OUR MANUFACTURING UNIT

We have equipped ourselves with best machineries for multi-layer extrusion, fine detailed printing / lamination, and converting line for developing innovative and exciting pouches/bag.

We have the ability to develop highly précised poly films as thin as 20 microns and capacity of 300 Kg/hr. Our printing and lamination unit is one of the best available in India with printing capacity of 250m/min.

Our Duplex slitting rewinding machine with operating speed of 700 m/min is best poised for slitting jobs with highest accuracy.

Our Converting line consists of multiple side/bottom sealing and pouch making machines to provide our customers with innovative and exciting packaging solutions. Apart from our basic machines, we have placed automatic control systems at various point intervals to provide error-proof experience for our customers.

MACHINERY DETAILS

Mamata - Brampton Multi Layer Extrusion Plant:

Key feature : Highly précised 3 layer poly films with thickness from 20 microns as per industry standards.

Capacity : 300 Kg/hr.

Expert Make 8 Colour Rotogravure Printing Machine:

Key feature: Highly precised rotogravure 8 colour printing.

Suited for: LDPE/LLDPE - 20 to 100 microns

BOPP: 15 to 40 micron

Surface printing for highly precised jobs such as baby/feminine care products.

Capacity:

250 mtrs/minute printing speed.

Web width : 1250 mm.

Expert Solventless Machine:

Key feature:

Suited for:

BOPP/MET BOPP - 15 to 30 microns

LDPE/LLDPE - 25 to 150 microns

Laminates- Up to 100 microns

Capacity:

300 mtrs/min.

CI Flexographic Press:

Key feature: Suited for: Surface Print LDPE Poly – From 20 microns PET/BOPP - Reverse/surface print
Capacity: 300 mtrs/min.

SP Ultraflex Slitter Rewinder Machine (Overhead Path):

Key features: Best layout for a hygienic work environment, especially suited for pharmaceutical and food industries.
Capacity: Minimum slit width: 50 mm (25 mm)
Speed: 700 mtr/min

Mamata Pouch Making Machine

Key feature:

Vega series CP is a servo driven pouch maker to convert laminates of Polyester , BOPP from 25 to 125 microns into center fin seal pouches. We have various attachments like Gusset Edger Sealers, Edge guide, progressive Side Gusset, Round hole punch, Hanger (Euro hole) punch, Tear slit punch and Perforation.

Speed: Center Fin Seal pouches : 180 cycles/minute
Three Side Seal Pouches : 150 cycles/minute

Mamata Universal Bag Making Bags:

Key feature: Pneumatic dancer for better web tension control.

Universal Seal Head System for Easy and Fast change over for side seal, bottom seal and mix (twin) seal jobs.

Capacity: Maximum web width of 1000 mm with speed up to 325 cycles/minute.

Mamata Side Seal Bag machine:

Key feature: Suitable for converting PP/LD-LLDPE/HDPE materials from 10 to 100 microns.

Capacity: Speed of 250 cycles/minute

INFRASTRUCTURE

Our plant has been designed to follow the best Industrial practices, taking into account various hygienic and safety norms as per food/pharma Industries. We have applied for ISO:22000 Certification, which is under process. We have separate dedicated facility for quality checks, Test labs and R&D centre. Allocated space for finished good/raw materials is kept under thorough inspection to ensure cent percent quality measures.

- Well defined area for different processing steps.
- Separate area for storage of Inks, Cylinders, Raw materials.
- Distinguished storage & material movement tracks.
- Triple layered Insulated shed wall for Temperature control.
- Positive air pressure system to keep the working area clean and temperature regulated.
- Building and amenities as per ISO & BRIC Guidelines
- Test Lab & R&D center equipped with latest machineries for Dart test, Tensile strength, Opacity tester, Ash content Test, Shrink test, Gauge meters as per industry standards.
